1. **Daily Account Balance** is measured by the amount of funds held in this account at the end of each day.
2. **Transaction:** A transaction is a combination of debited items (withdrawals), credited items (deposits), and deposited items per statement cycle, and includes the following: **Credits**—any deposit into the account; **Debits**—any withdrawal such as check, draft, ACH or other debit against the account; **Deposited items**—each individual item that comprises a deposit such as a check or other item deposited.
3. **Variable interest rate:** Your interest rate and annual percentage yield (APY) may change at our discretion at any time without notice. The APY assumes that interest paid remains in the account. A withdrawal will reduce earnings. We use the daily balance method to calculate the interest on your account. This method applies a daily periodic rate to the collected balance in your account each day. See your Deposit Account Agreement for more information on how interest is calculated using the "daily balance method."

Both ways of Real Time Processing pause at an End-of-Day Cutoff Point but resume the following business day. Interest is calculated and balances are determined (including balances for statement purposes, the Available Balance, any Overdrafts, or Insufficient Funds), at the End-of-Day Cutoff Point.
